

Eyoyo EY-017P barcode scanner on an Android smartphone.

1 – Smartphone configuration.

In the smartphone's advanced security settings, enable screen pinning.

Example: Parameters

Security

Other settings

Active Screen Pinning →

Uncheck automatic screen rotation

Choose Gboard as your virtual keyboard

After activating the virtual keyboard by positioning the cursor in a text field, the virtual keyboard appears at the bottom right of the screen; press the icon that represents a keyboard and choose the gboard keyboard .

2 – Eyoyo configuration

Restore the barcode scanner by scanning the [Restore Defaults QR code](#) in section 8 of the manual.

Choose [the Fast option](#) in the Transmission Speed Setup section by scanning the corresponding QR code.

[Choose the French language](#) in section 13 Keyboard Language setting by scanning the corresponding QR code.

Select [Volume Low](#) in section 14 Beep & vibration Setting by scanning the corresponding QR code.

In section 15 Sleep Time Setting, choose by scanning the corresponding QR code. The Never Sleep [scanner sleep time](#) is recommended.

(At the end of the session you can turn off your scanner by scanning the Sleep QR code) Now)

In section 18 Scanning Mode setting, you can avoid pressing the scanner buttons by choosing the [Continuous Scanning Mode option](#).

3 – Pair the scanner with your smartphone via Bluetooth

Go to the Bluetooth settings on your smartphone.

Check that the blue LED on your smartphone is flashing.

The EY-017P device will appear in the list of available devices.

Choose it.

When requesting to join, do not grant access to your contacts and confirm the association.

The scanner's blue LED will become steady; your scanner is paired.

(You can always request on the smartphone to unpair the scanner in case of malfunction and restart the pairing process.)

4 – Launch the Billetix scanner app on your smartphone

Launch the Billetix scanner app on your smartphone by entering the URL in a browser.

<https://billetix.net/scan.html>

Create a [shortcut to this page](#) on your smartphone's home screen (required), command available in the browser settings on the open page.

Restart the application using this shortcut.

Open the list of running applications (by pressing the square at the bottom of your screen) and [press the pin](#) at the bottom of the Billetix application and answer ok to confirm.

To remove the app pin, press the triangle at the bottom of your screen for a few seconds.

Your application is now operational.

You can [enable or disable the virtual keyboard](#) by clicking the keyboard icon in the bottom right corner of the screen when it's active, or by toggling the Virtual Keyboard Display switch. If the keyboard isn't displayed, click the keyboard icon to the right of the barcode entry field.
